Get Better Search Rankings With Unique Article Wizard

Links are the the most important thing to any online marketer who makes his living through organic search rankings. I know this fact from experience since I am an organic search focused internet marketer. I make more than 90% of my money from the organic search rankings I have achieved for my sites on Google and the others.

One of the main tools I've used to build the backlinks which lead to these top Google rankings is [Unique Article Wizard](#). I should mention that UAW is not the only article marketing link building system that I make use of, I also use others such as [Article Ranks](#). That being said, the rest of this article will focus on the features of Unique Article Wizard.

Each submission can include 5 backlinks. That's two links in the body, two more in the resource box as well as a 5th link as part of an embedded video (I always use YouTube videos.) The backlinks can be spun as much or as little as you want. You can spin both the destination URLs and the anchor texts.

With the huge amount of links you can include in each article submission and the spinning that you are able to do you can cast a wide net with each of your submissions. Sometimes I build links to 40 to 50 different target pages with a single submission. This is really great because it gives you more chances to rank on the search engines.

For example, there are some search phrases where I have 8 or 9 of the top ten Google results filled with my different target pages and I got all of them there with the power of article marketing.

On the negative side of things, UAW can be somewhat confusing to use at first because there is a learning curve. But once you've figured it out, it is not too hard at all. It is definitely worth figuring out because then you have got the ability to crank out as many links as you want. All you have to do is write up the articles.
